

anecdata

Anecdata is a free online citizen science platform to support individuals and organizations in collecting, managing, and sharing citizen and community science data.

Create

Project managers create projects, choose data licenses, and create the datasheets.

Collect

Participants join projects and use the Anecdata website or mobile app to make measurements and collect data.

Share

Data are incorporated into the project and can be analyzed and shared!

Get started @ [Anecdata.org](https://anecdata.org)!

Anecdata is used by hundreds of individuals and organizations in 76 countries and 6 languages to gather, share, and access citizen science observations.
