

At-Risk Data Commons: An Overview as of Dec 2019

Ruth Duerr and the rest of the team!

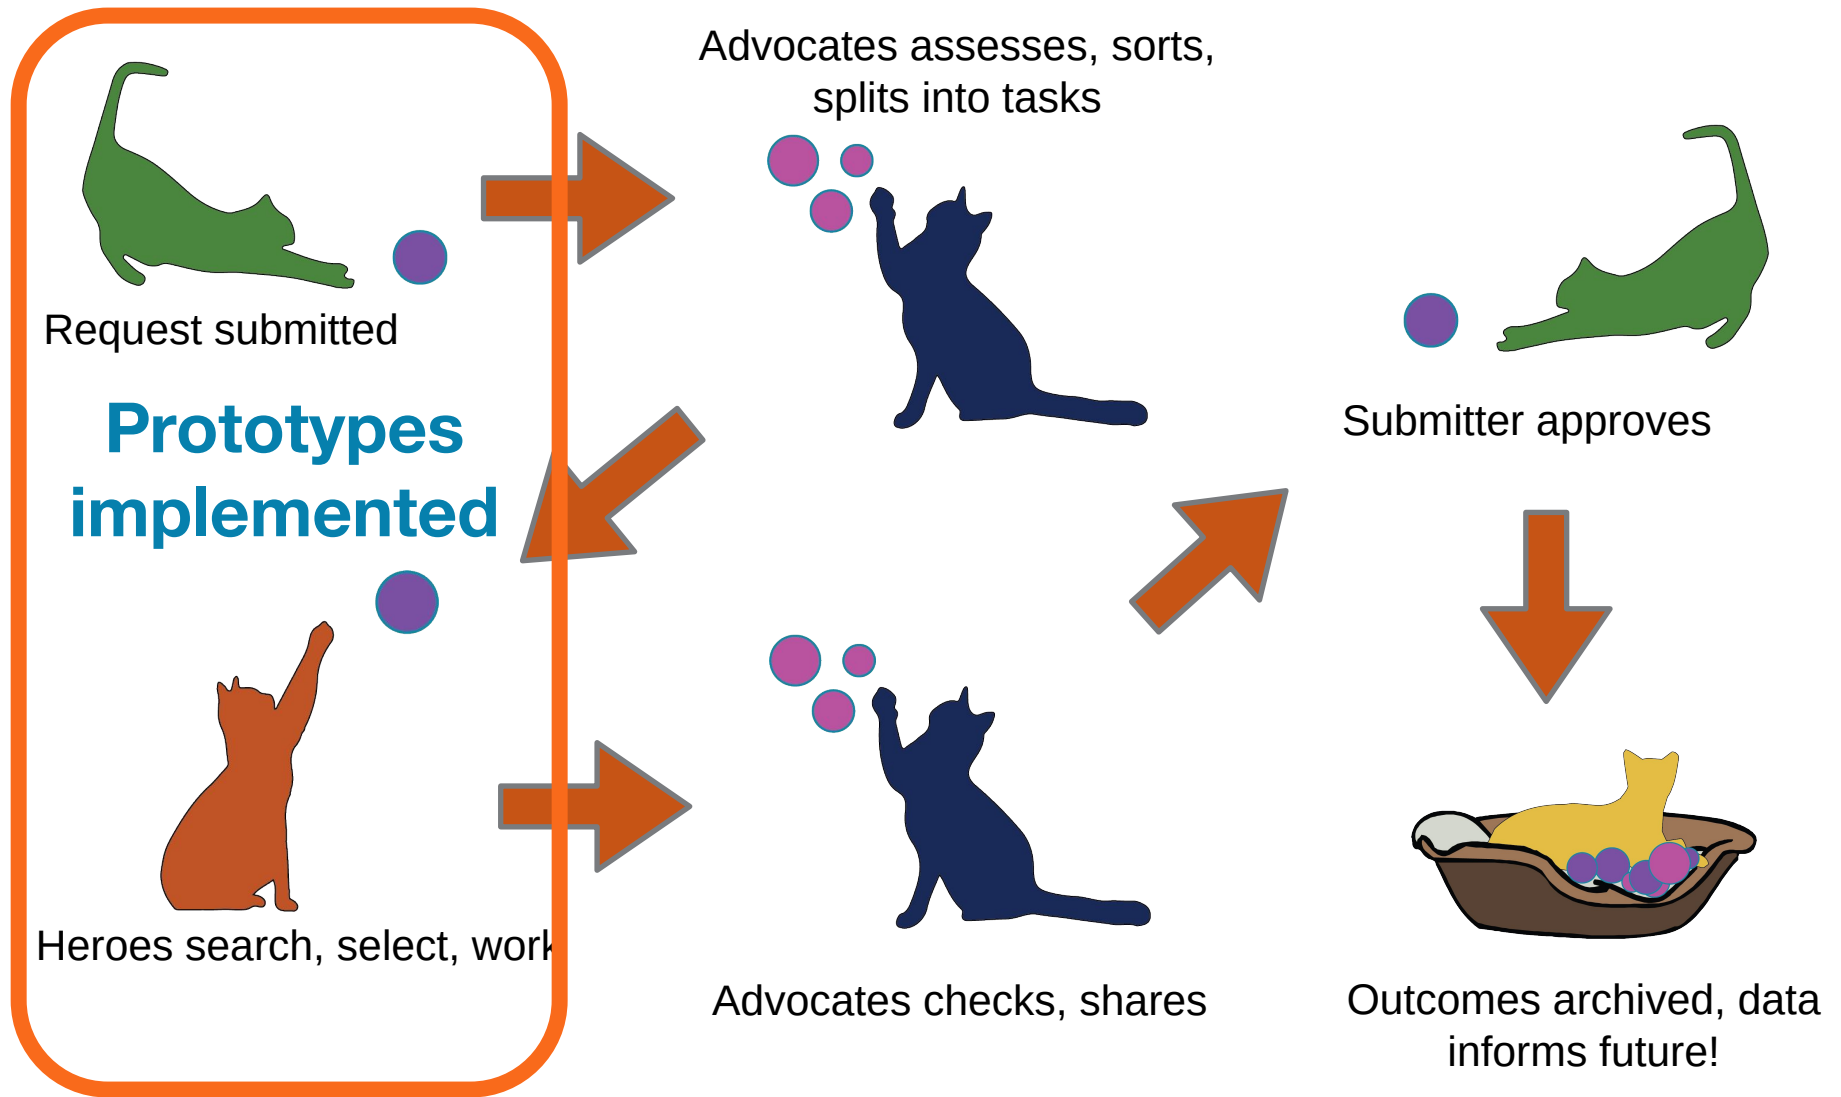

The At-Risk Data Commons (DataAtRisk.org) is a website and associated non-profit organization that connects people with data at risk to volunteers, data experts, and additional resources.

A Match.com for data at risk and orphaned or surrendered data.

Envisioned Process at a High Level

High Level Implementation Status

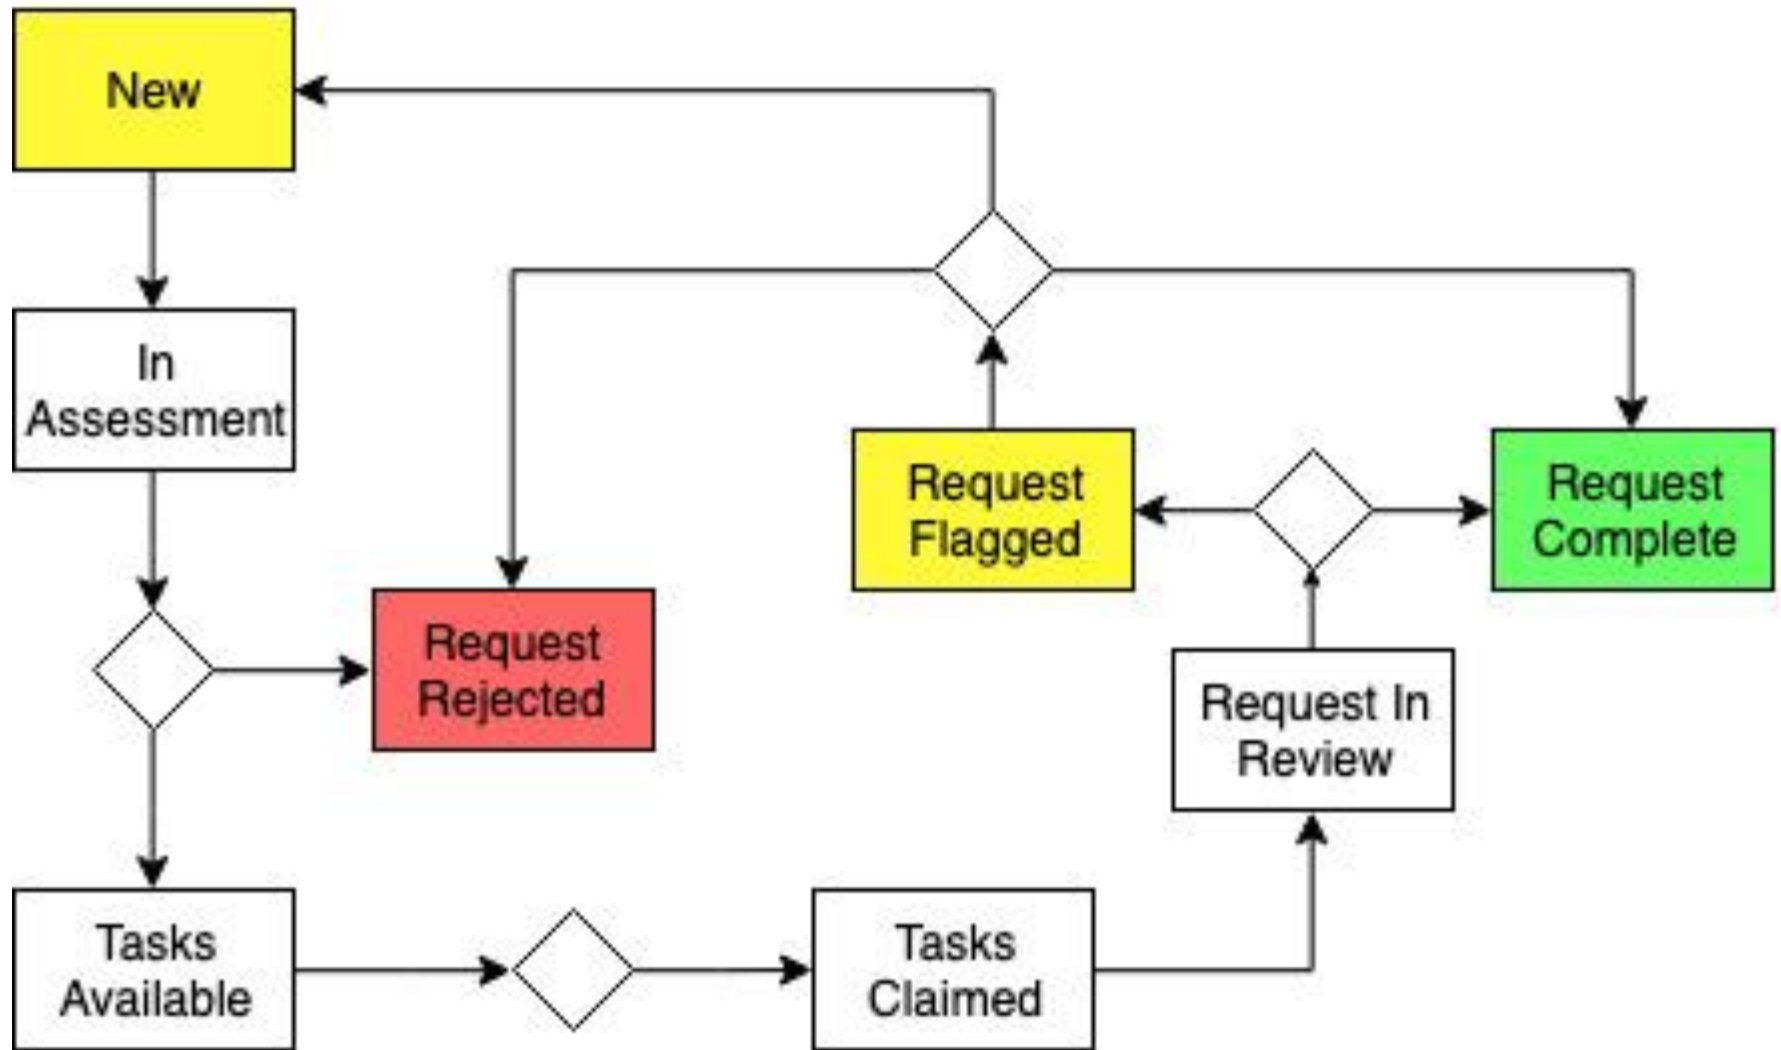

Design and Development Status

- Tools specification document exists and is updated as we address new parts of the process
- Use cases drive process details. For example:
 - Multiple types of Data Heroes
 - Digitization
 - Investigation
 - Metadata
 - QAQC
 - Programmers
 - Need to split requests into doable tasks

Design and Development Status

- SGCI
 - Science Gateways Community Bootcamp last year
 - Quarter time technical support to start this month to work on interfaces, etc.
 - Security and UI/UX work upcoming
- Use cases (user scenarios?)
 - Save 1930's streams and waterways images (<https://tinyurl.com/yh4rnk7b>)
