NCEAS

The problem

Despite the power of open data science*,
many scientists struggle with data and code – as individuals

This matters now

Scientists are perpetuating homegrown practices,
and with time-sensitive global challenges there's no time to waste

A contributing solution

Welcome scientists to open data science
and empower resilient habits and mindsets – as teams

* the tooling and people enabling reproducible, transparent, and inclusive practices for data analysis

Open data science

Tooling
tools & practices

People
teams & community

Tooling

tools & practices

People

teams & community

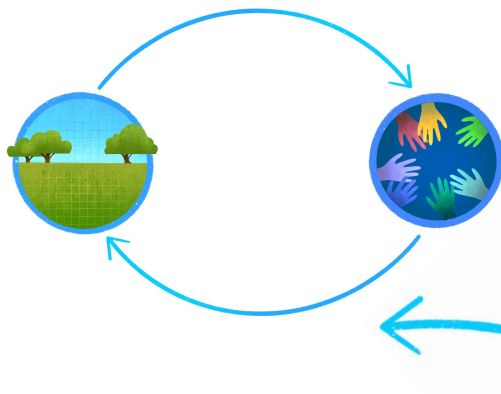

- Open source coding   R Studio
- Version control  git
- Collaboration platform  GitHub
- Real-time co-development 
- Connection to broader communities 

- Vertical & horizontal leadership 
- Trust, kindness, willingness, & learning 
- Create norms about data & docs, leverage overlapping skills, on/offboarding 
- Join global & create local communities

Tooling

tools & practices

People

teams & community

- Open source coding  R Studio
- Version control  git
- Collaboration platform  GitHub
- Real-time co-development 
- Connection to broader communities 

- **Vertical & horizontal leadership**  
- **Trust, kindness, willingness, & learning** 
- Create norms about data & docs, leverage overlapping skills, on/offboarding 
- Join global & create local communities

Our path to better science in less time using open data science tools

OPENS CAPES CHAMPIONS

An open data science mentorship program for science teams.

Core design to empower lasting habits and mindsets for resilient culture change

- Team- and cohort-based, including team leads and members
- Open data science as an entryway to much more
- Deliberate focus on empathy, inclusion & kindness
- Mentored-coached Mozilla-style: remote-by-design
- Lesson series focus on tooling & people

Tooling tools & practices

People teams & community

- Streamlining workflows, interoperability
- Reproducibility
- Transparency
- Collaboration
- Communication & publishing

- Team mindset: Future You, Future Us
- Reimagine challenges: expect there's a better way; you're not alone, it's not too late
- Openness: trust, inclusion, belonging
- Empower horizontal leadership, Champions

Call 1: Introductions, Openscapes overview & mindset

January 17th, 2019
10:30 PT (11:30 ET)
(1 hour 25 minutes)

This week: In our first meeting as a full cohort, we'll introduce ourselves to one another and work towards common understandings of the Openscapes mindset and how it might benefit our science and our labs.

Zoom room:

Recording

Roll call

Name / organization / email / GitHub or Twitter handle

- Julie Lowndes / Mozilla Fellow, NCEAS / julies32@gmail.com

Agenda

- Welcome! (5 min) - Julie
- Welcome to Openscapes - thank you for being a part of the inaugural cohort!
- Introduce program lead
 - Julie Lowndes
 - Marine data scientist at NCEAS (2013-)
 - Mozilla Fellow (2018)
 - PhD from Stanford/Hopkins Marine Station (2012)
- Quick introduction to collaborative notes
 - We'll be a document like this for every cohort call
 - Sign your name in roll call
 - Comments / emojis / gifs / +1s are welcome!
 - Shared note taking! We will do this for each cohort meeting - check

Openscapes Champions Series

Julie Lowndes

2019-03-14

Chapter 1 Welcome

This book is a lesson series for the Openscapes Champions program. *It is under heavy development; some chapters are only notes at this point.*

Openscapes Champions is a mentorship program that empowers environmental scientists with open data science tools and grows the community of practice. We mentor early career environmental researchers in leadership roles - faculty, lecturers, program managers, and others who want to establish open data science practices in their labs and on their campuses. It is designed to meet scientists where they are and help identify incremental steps to make their data workflows more efficient and open. We've been building Openscapes from an open data science angle, but along with that comes the mindset of openness, collaboration, good intentions, and creating the culture we want in science. Note: "lab" is broadly defined.

The Series is framed around Lowndes et al. 2017, *Nature Ecology & Evolution: Our path to better science in less time using open data science tools*. That paper is a retrospective of how a team's data workflow changed over four years; the Openscapes Series aims to help guide other labs to incrementally make similar progress themselves, no matter where they are starting from.

Supercharge your research: a 10-week plan for open data science

1. Normalize data discussions
2. Identify and address shared needs
3. Think ahead for Future You & Future Us

Lowndes et al. 2019, Nature

"This isn't just about coding & GitHub, it's about changing the way we do science."
- Prof. Malin Pinsky

*"Openscapes has created a new way of thinking about merging empathy and science.
That's an invaluable gift to me."*
- Prof. Halley Froehlich

OPENS CAPES CHAMPIONS

OPENSAPES

LET'S DO BETTER SCIENCE
IN LESS TIME
TOGETHER

We welcome scientists to open data science, and grow the movement.

Engage: build awareness and excitement with empathy, art, and storytelling

Empower: connect with existing open software and communities

Amplify: champion broadly to increase visibility, value, and practice
