

# Information Quality and The National Climate Assessment

Sarah Champion

*Data Architect*

NOAA's Technical Support Unit for the National Climate Assessment

# Overview

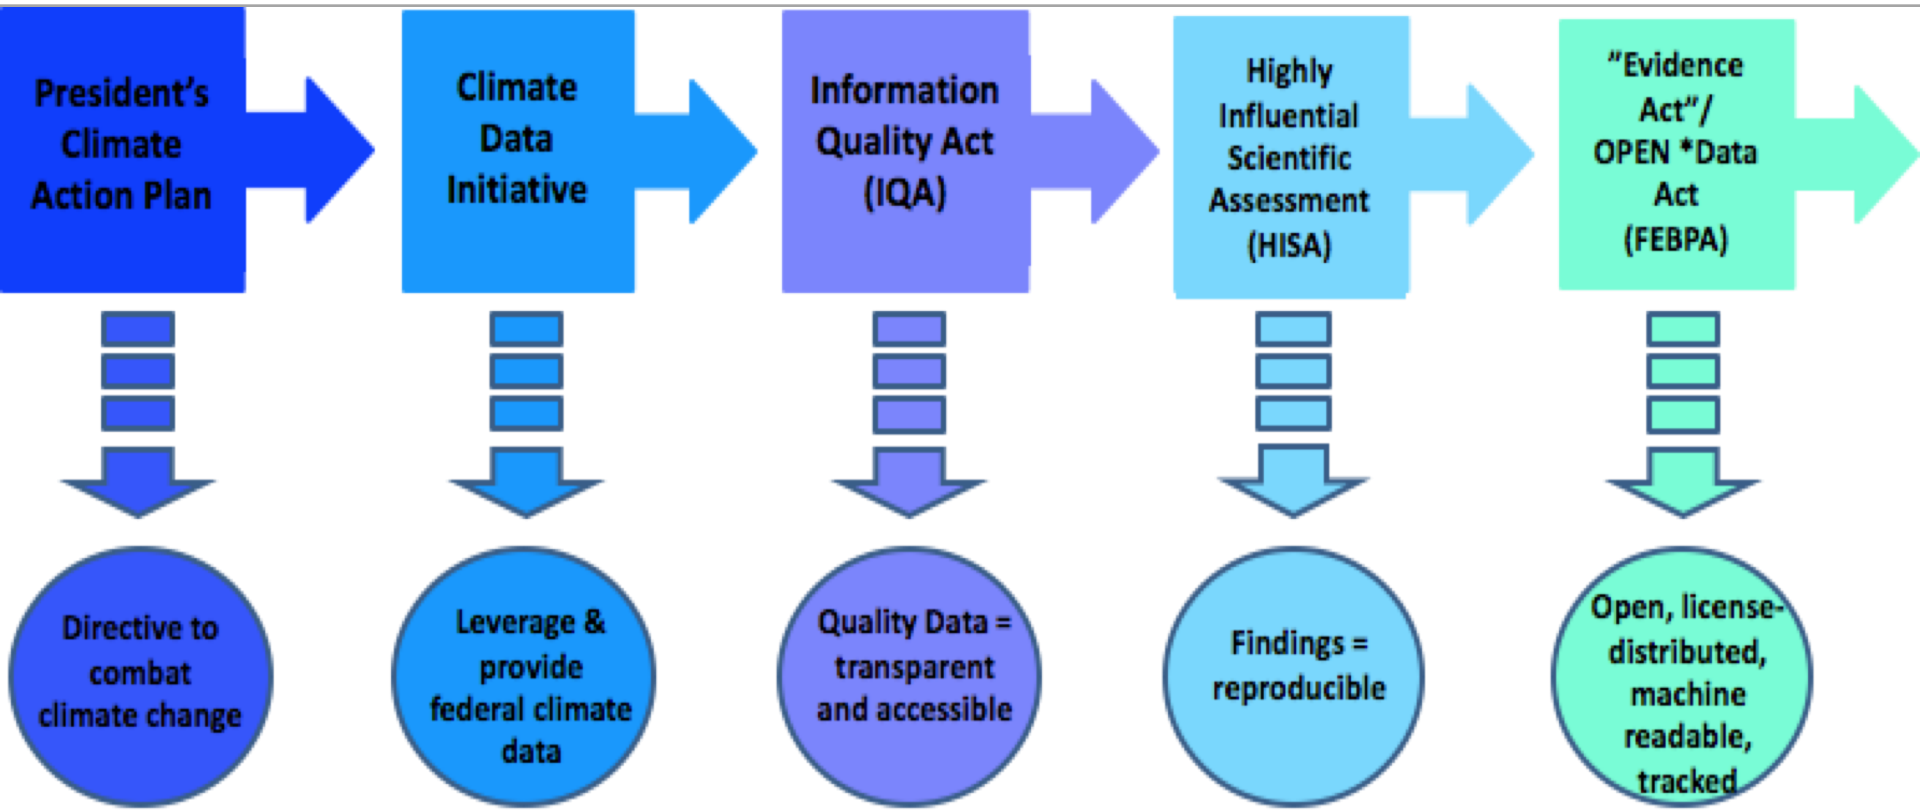

- The National Climate Assessment (NCA)
- Information Quality
- Challenges
- NCA Tools and Practices

# The National Climate Assessment

- Global Change Research Act of 1990
- Requires a state-of-the-science assessment of climate impacts and trends for U.S. regions and sectors every four years
- Aims to inform decision and policy-making stakeholders
- Part of a Sustained Assessment process

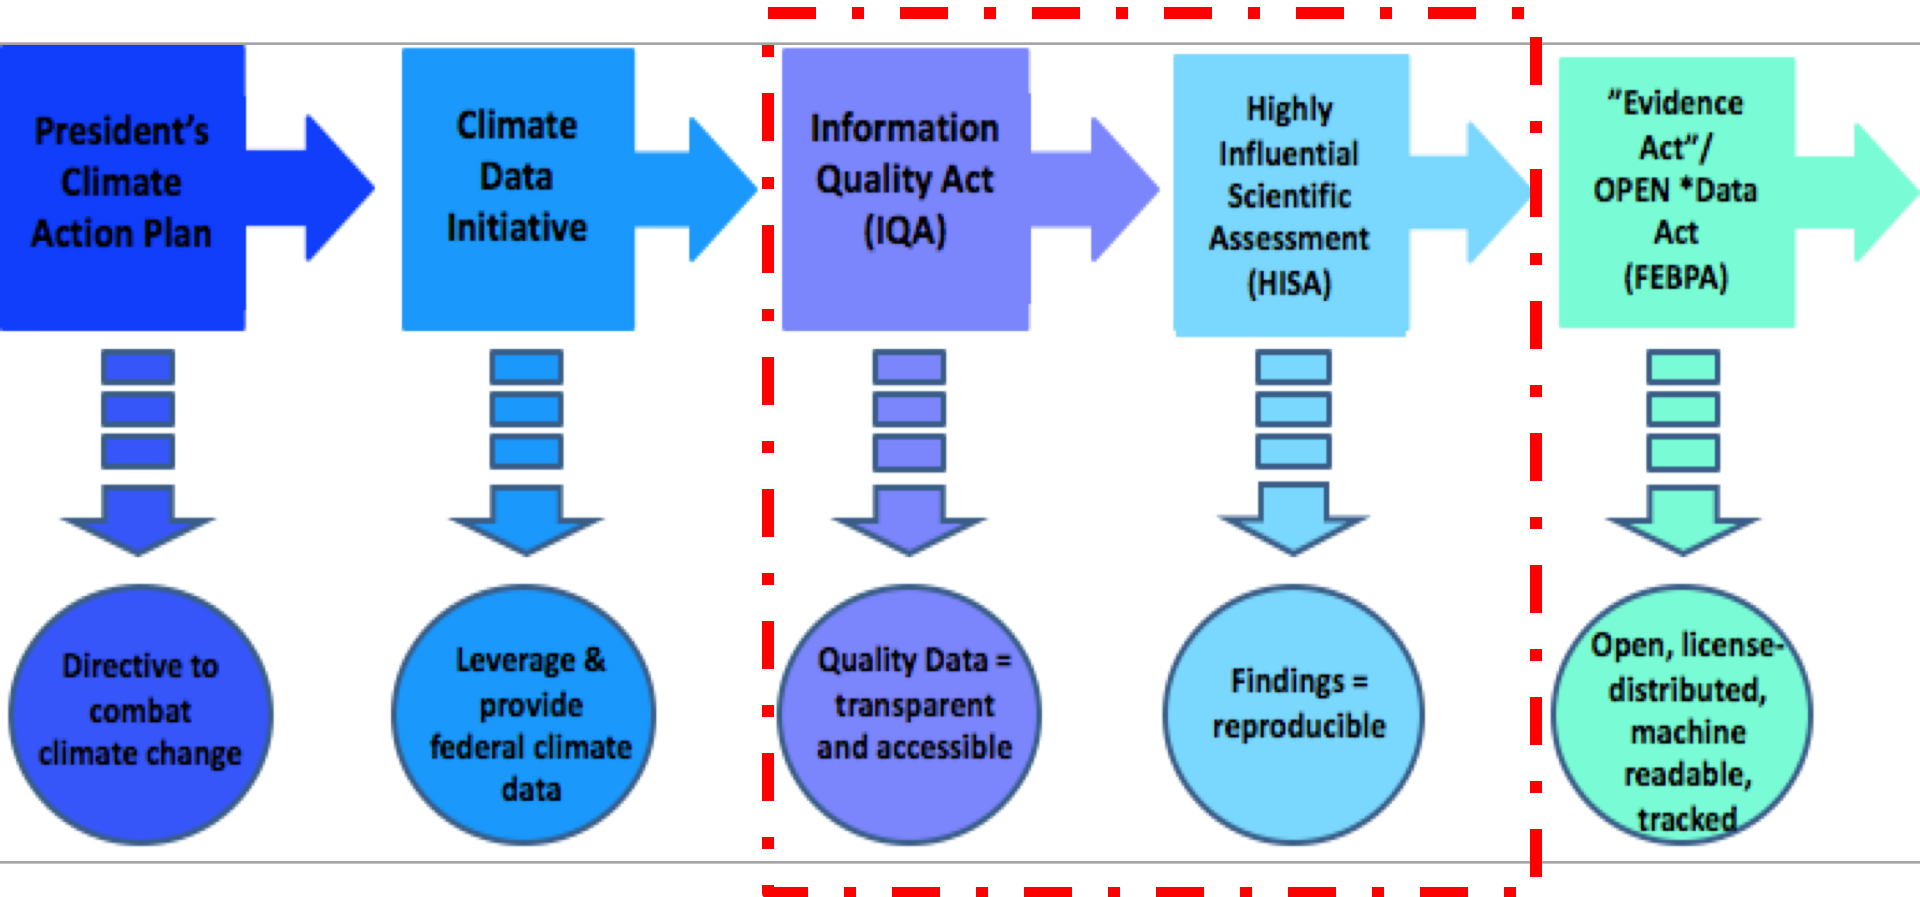

# Information Quality

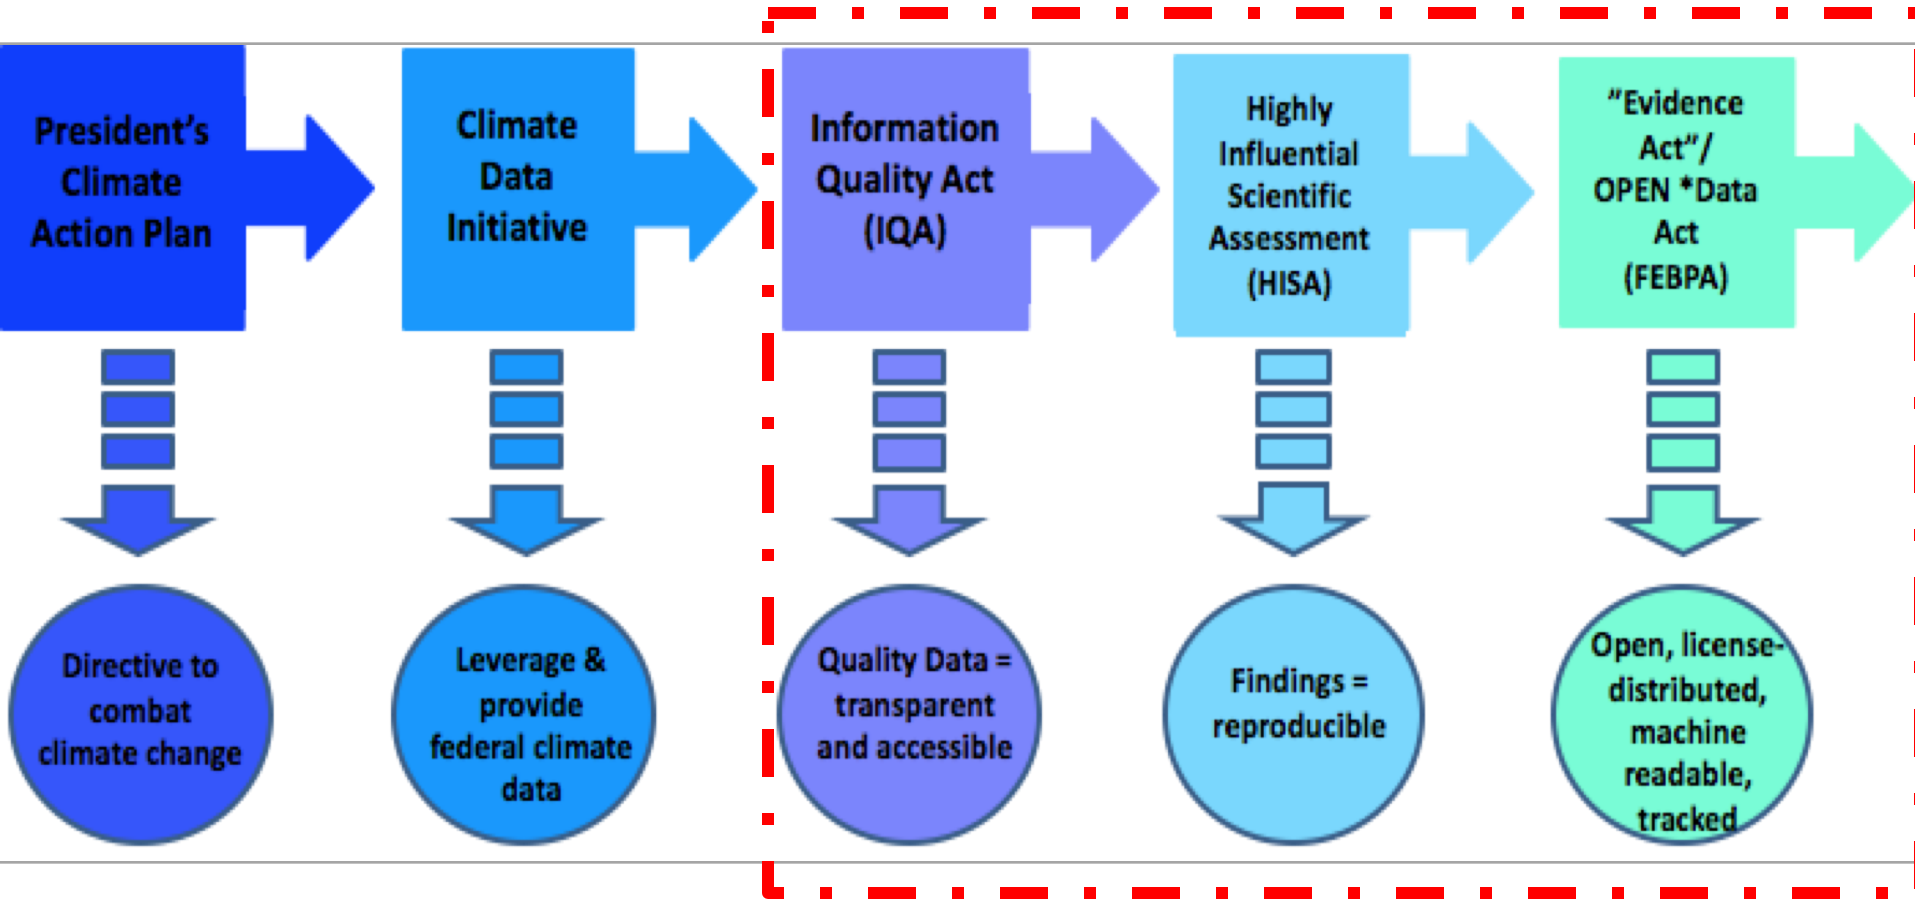

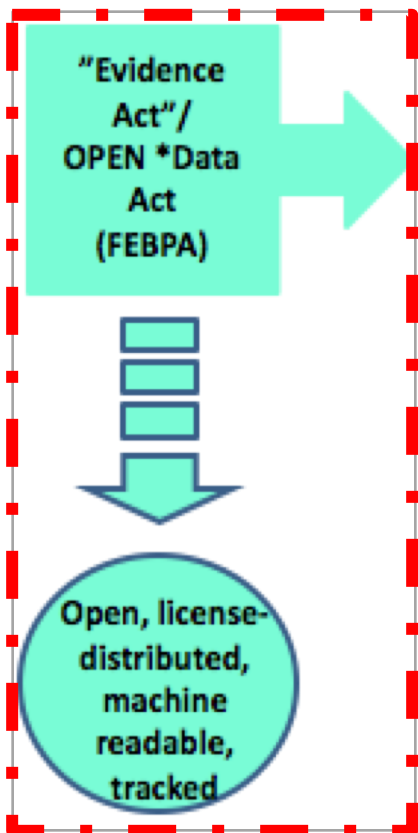

# Information Quality

# Information Quality

# Challenges

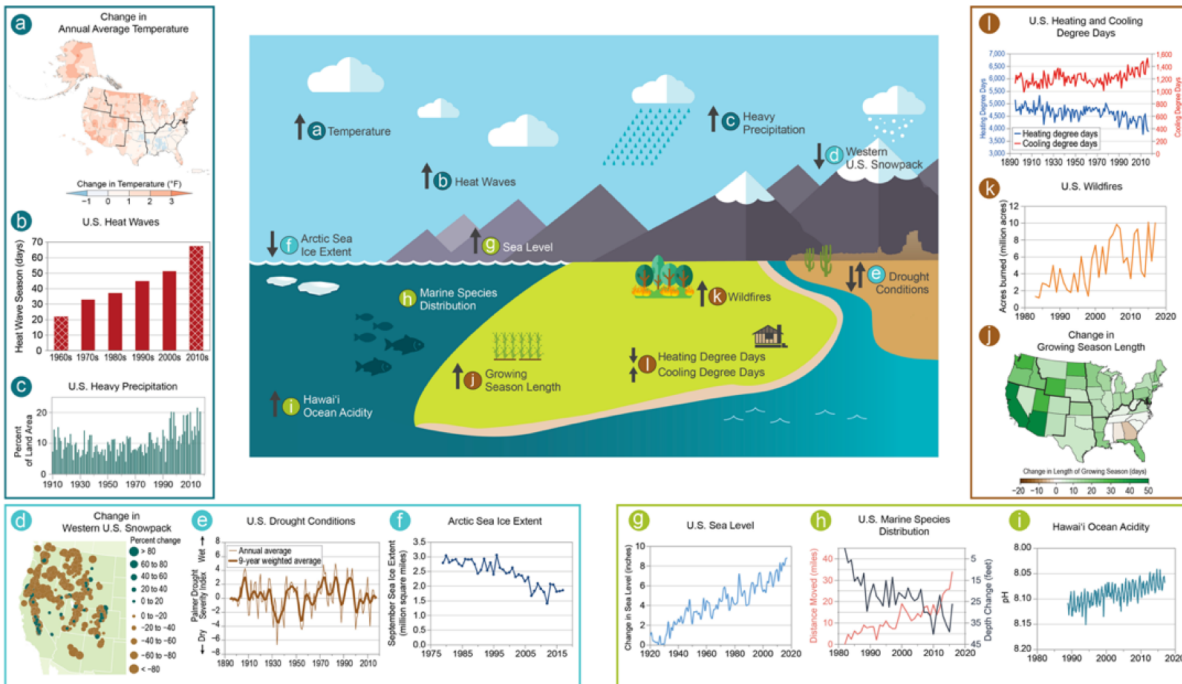

- 1970 pages
- 975 figure panels
  - 152 datasets
  - Sources
  - Methods
  - Tools
- 350+ authors
  - 15 federal departments
  - 5 national laboratories
  - 20 research institutions and non-profits
  - 3 government contract companies
  - 28 local (city, state, and tribal) government organizations
  - 65 universities

*\*Note that several non-federal organizations were not U.S. institutions*

# Challenges

13 figure panels:

- Source(s)
- Copyright
- Dataset(s)
- Analysis Methods
- Visualization Methods
- Software
- Hardware
- File(s)

Documentation Standard:

Transparency

Accessibility

Reproducibility

# Challenges

13 figure panels:

- Source(s)
- Copyright
- Dataset(s)
- Analysis Methods
- Visualization Methods
- Software
- Hardware
- File(s)

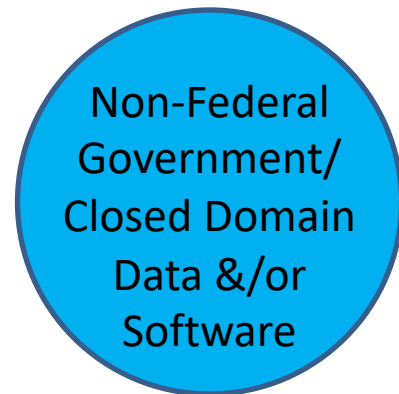

Documentation Standard:

- ✓ Transparency
- ✓ Accessibility
- ✓ Reproducibility
- ✓ Licensing
- ✓ Software Code

# NCA Tools and Practices

- ✓ Document source metadata using current tools and processes
- ✓ Identify associated licenses as defined by agency/organization

- ✓ Document source metadata using current tools and processes
- ✓ Work with a team from NOAA General Counsel to determine Intellectual Property and Copyright Ownership/Permission

# NCA Tools and Practices

- All tied to the [Federal Data Strategy](#):
  - Designed to help all agencies leverage [data as a strategic asset](#)
  - Guides the Federal Government in practicing ethical governance, conscious design, and learning culture
- NOAA's Data Strategy is to promote a culture that values [data as an asset](#) by “sharing data as openly and as widely as possible to promote utilization of NOAA data”

# NCA Tools and Practices

- Data as an asset extends beyond the Federal Government
- Scientific research and academic publishing have been heavily influenced by the shift to increasingly internet-centric (i.e., digital)
- We no longer have to physically travel to the library to access research

# NCA Tools and Practices

- System has not historically incentivized open practices<sup>1</sup>
  - 2009: ~4,800 open access journals
  - 2019: 12,500 open access journals
  - Incentives #1 and #2: Access and competitive edge
- *Transparency, openness, and reproducibility are readily recognized as vital features of science*
- OSTP: Changes needed to better share COVID data<sup>2</sup>
  - COVID-19 Open Research Dataset (CORD-10)
  - 2,200 Papers submitted in a single week

<sup>1</sup> Björk, Bo-Christer (2011). "A Study of Innovative Features in Scholarly Open Access Journals". *Journal of Medical Internet Research*. **13** (4): e115. doi:10.2196/jmir.1802. PMC 3278101. PMID 22173122.

*“You can have data without information, but you cannot have information without data.” – Daniel Keys Moran*

# Summary

- The NCA is mandated to ensure its data assets are transparent, accessible, reproducible, and open
- Historically, the NCA has maintained the latest opinion that data are a strategic asset
- Thorough and complete documentation will continue to be the NCA standard
- Regardless of motivation, quality information is rooted in the concepts of innovation and collaboration
