

ESIP and NOAA: Together Putting Data to Work

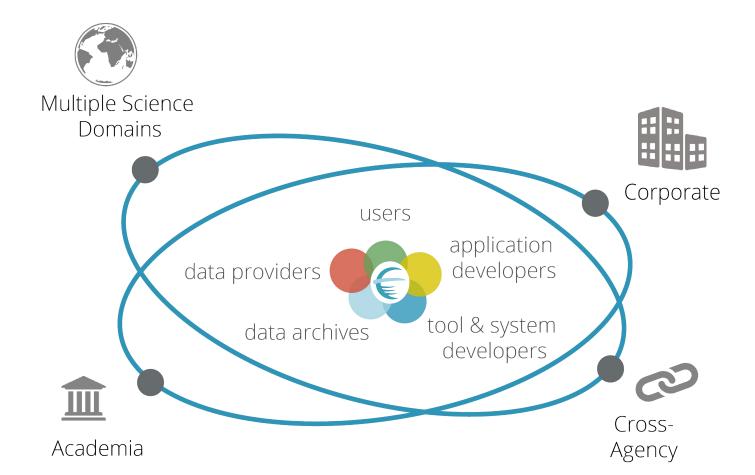

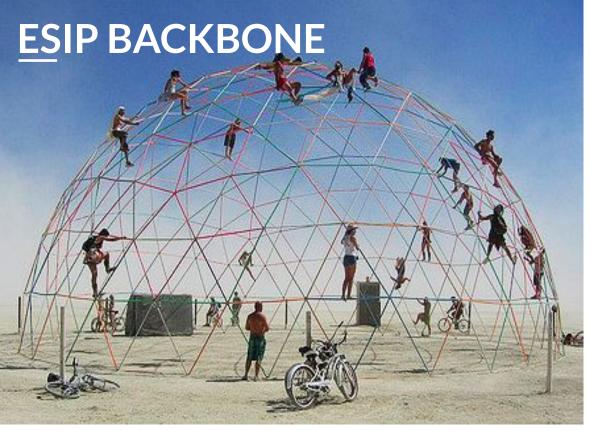

Erin Robinson
Outgoing Executive
Director

Susan Shingledecker Incoming Executive Director

Annie Burgess Lab Director

Megan CarterCommunity Director

Welcome Susan Shingledecker Incoming Executive Director

Experience with NOAA

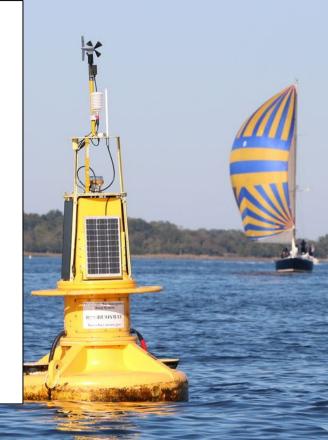

12 years with BoatU.S. and understanding the data needs of the nation's recreational boaters.

Served on the Chesapeake Bay Observing System Steering Committee (CBOS) 2006-2010

Appointed to NOAA's Hydrographic Services Review Panel (HSRP) 2010 -2018

Worked with numerous NOAA line offices including:

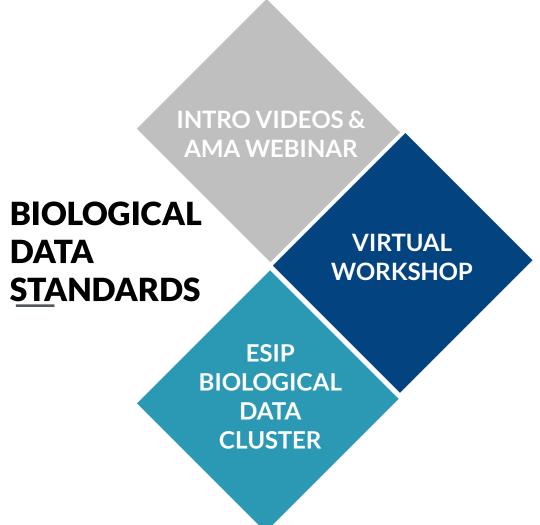

- NOAA Marine & Aviation Operations (OMAO)
- NOAA Marine Fisheries Service (NMFS)
- National Ocean Service (NOS)
- Office of Oceanic and Atmospheric Research (OAR)
- National Weather Service (NWS)

2020 ESIP THEME

Putting Data to Work: Building Public-Private Partnerships to Increase Resilience & Enhance the Socioeconomic Value of Data.

► Stage 1: videos + AMA
esipfed.org/biostandards-overview

► Stage 2: virtual workshop https://bit.ly/biostandardssummar

Y

Collaboration through ESIP meeting with Marine Data Cluster & CF sessions

► Stage 3: ESIP cluster

Monthly meetings as part of an ESIP

Biological Data Standards Cluster.

Subscribe to the cluster list-serv: https://bit.ly/biostandards-subscribe

ESIP IQC/BSC Pre-ESIP Workshop Report Out

ESIP IQC co-organized a virtual pre-ESIP workshop on 7/13/2020

- Community guidelines for FAIR dataset quality information,
- Explore the needs, challenges, and existing approaches by various (global) Earth Science organizations.

This SM20 session

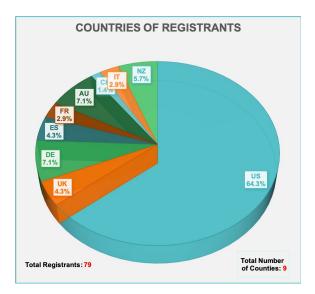

- o Pre-ESIP Workshop and its outcomes,
- Presentations from workshop participants,
- Open discussion among the ESIP community, workshop participants and organizing committee members.

Takeaways

 Community guidelines: i) Beneficial; ii) Iterative process with a feedback loop (funders, data producers, data users, and data managers); iii) Actionable; iv) Consideration of long-term sustainability.

Organizational Strategies, Standards, & Policies for Machine Learning

Engaging with different organizations to discuss how ESIP community can support/promote the adoption of machine learning for all Earth science domains.

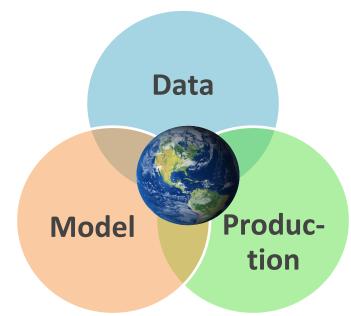

Takeaways:

- There is increasing needs for ML ready data for Earth sciences;
- Maturity level criteria are needed for both data and models;
- Lack of (cross-agency) best practices for curating ML ready data to ensure interoperability.
