

Registry of Open Data on AWS

When data is shared on Amazon Web Services, anyone can analyze it and build services on top of it using a broad range of compute and data analytics products, including [Amazon EC2](#), [Amazon Athena](#), [AWS Lambda](#), and [Amazon EMR](#). Sharing data in the cloud lets data users spend more time on data analysis rather than data acquisition.

The [Registry of Open Data](#) on AWS makes it easy to find datasets made publicly available through AWS services.

Datasets currently available through the [Registry of Open Data on AWS](#) include the following:

Satellite	Weather	Climate
GOES 16/17	ERA5	CESM LENS
Landsat 8	GEFS Re-forecast	CMIP6
Sentinel 1/2/3/5P	GFS	MUR SST
Himawari 8	HRRR	NEX
RAPID NRT Flood Maps	NBM	SILO
